

## CREATING A HOME HOCKEY PITCH IN COMBERTON

**Although we've installed and resurfaced many hockey pitches over the years, we haven't built many in private homes. Here we scaled down our sports pitch design and transformed a garden into a beautiful and useful space.**

### THE CHALLENGE

- To lay both an area of artificial lawn, and an area of the space to be used as a hockey pitch.
- The client played to a high standard, so the pitch needed to be suitable for heavy use and serious play.

The dual purpose garden will need to keep both the parents and kids happy for years to come.

### THE SOLUTION

- ✓ We chose to use our high quality Kings Artificial Grass. As well as giving the pitch a smooth, even surface, this type of grass provides a natural finish, ensuring the lawn looks as good as it plays.
- ✓ Underneath the artificial grass we installed a consolidated 150ml dynamic base with a SD25 shock pad, finishing it off with a Tigerturf Evo Pro sports grass.
- ✓ Perfect for aspiring professionals, this high end surface will look and feel great for years.

### SERVICES USED

- ✂ Part/Full Surface Rejuvenation
- 📦 Infill replacement
- ⬇ Resurfacing

### CONCLUSION

The owners of the house were extremely pleased with the finished result. The smooth transition between the ornamental area of the lawn and the playing surface gave the garden a unified aesthetic, while added landscaping helped the artificial surface to blend seamlessly into the overall design, which is always an important factor in undertaking any project of this kind.
